Oasis PureBlue® Filters

The Oasis Pure Blue filter gives your hot tub crystal clear water and increased filter life. The filter catches debris and bacteria in your hot tub meaning fewer bacteria and odours and less cleaning

Improved water quality

Ozone is a powerful oxidizer that can destroy bacteria, viruses, and other contaminants in the water.

Reduced chemical use:

Our ozone mixing chamber allows for a lower concentration of chemicals in the water, making it safer and more pleasant to use.

Longer-lasting water:

Ozone helps to prevent the buildup of organic material in the water, which can lead to cloudy water and unpleasant odours. By reducing the buildup of contaminants, the water in the hot tub can last .

Optional Hot Tub Wifi Bluetooth and Speakers

WIFI CONTROL

Control your hot tub home and away with your mobile giving you true freedom to change the temperature before getting home. Plus the added benefits to change filter time and check your hot tub is running perfectly

BLUETOOTH

As you wind down in your spa listen to your favourite music via Bluetooth connection from your smart device!

You can connect to your smart device via Bluetooth. Supports iPhone, Android, tablets with Bluetooth support.

What's more relaxing than sitting in a hot tub? Sitting in a hot tub and listening to your favourite tunes! These speakers bring the music directly to you while you're enjoying the warm, bubbly water.

Each model can be fitted with 2 x side skirt mounted marine grade waterproof speakers.

Jets

E - Style Hot Tub Jets
Both Rotary and Directional

With 18 years of experience, the **SPATECH** control system offers a new world of possibilities for spa users.

The new fully-featured spa systems from **SPATECH** include all the premium features you'd expect, and offer the perfect balance between style and functionality. Both models include integrated WiFi options, and are engineered to be the most intuitive and robust system on the market. The systems are easy to configure and operate, with an emphasis on being both engineer and user friendly.

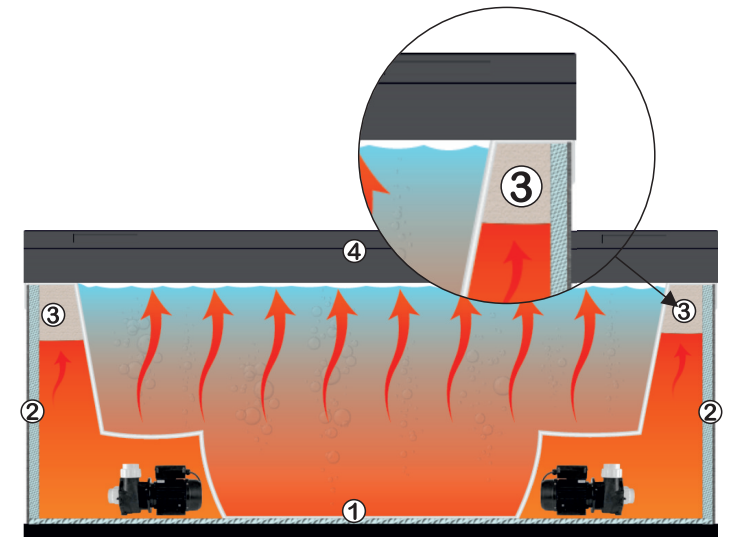

400 Watt Pre-heated Blower

This airjet Massage System is an addition to powerful hydro jets, Equinox hot tubs also include a soothing, pre-heated air bubble massage system which offers a different feeling plus great for the kids.

With our new edge foam insulation injected into the top quarter of the spa, we've noticed a significant reduction in heat loss. Whilst also leaving access to all pipes jets and equipment. The new equinox range incorporates all four elements of heat loss retention:

- 1: Silver thermal insulation sheet on the base of the hot tub,
- 2: Thicker silver thermal insulation on the sides of the skirt,
- 3: Full foam insulation in the top quarter of the hot tub,
- 4: Hot tub cover.

Dark wood side skirt

Alpine White acrylic

Dark Grey hot tub cover

EQ130 Lite

 13AMP 2kW

Small and compact and ready for small gardens and balconies .

-  Size 2000 x 1640 x 760mm
-  Intelligent Controls MP31-2kw
-  Skirt Lock & Base Insulation
